HCC Jenkins Migration								
Description								
Successfully complete the migration all necessary repositories to a new instance of Jenkins for the HCC team.								
Comments								
Luke, you were thrown onto this task: something that had been in our backlog for MONTHS but no one was willing to take on. It probably wasn't the most glamorous work, but you were more than willing to take on the tedious job and did so very, very well. I think it provided a TON of value to the team, AND was a great way for you to connect more broadly in data platforms to put many pieces together. You did a really great job on this and I can't even imagine what would have happened if you hadn't picked it up.								

Title	Goal Category:	Fundamental Execution	1	2	3	4	5	N/A
HCC Data Platforms Team Familiarization								
Description								
Gain familiarity with all the different sections of the HCC Data Platforms team.								
Comments								
I think the Jenkins migration helped with this and your work on Azure also provided a great foundation of what we do as a team. You are probably not as connected to things like Forge or Distributed tracing, though. I would encourage you to continue looking for ways to network and connect with people more broadly in your next rotation and beyond!

Kafka @ Azure							
Description							
Contribute to the teams effort of getting Kafka running at Azure. Whether it be directly working on that effort, or taking some work off of others plate, provide support in order to get the task completed in a timely manner.							
Comments							
You have really proven to be a motivated, hard working individual. You were very quick to pick up the things, as observed by multiple people you've worked with. I m incredibly impressed with your work, especially for someone who just graduated college and had zero prior kafka or public cloud experience.							

	Needs Improvement	Meets Expectations	Exceeds Expectations
Evaluation Summary			

12345

Luke, you've been a great addition to the team. You did an amazing job owning the Jenkins migration and then ramping up on Kafka at Azure. Others observe you to be technically astute and organizationally aware. I've had a lot of TDPs during my time and you have stood out to me in your peer group as being open to new challenges and willing to take on anything.

This feedback may vary based on who you are working with, but I would recommend continuing to balance exhausting available resources (documentation/google) with asking others on the team. It is always best to try to find something on your own, but that doesn't mean you need to spend days looking for an answer. One way to convey this to a person is to frame questions like "I've looked here and attempted x and y, but still don't know how to do abc."

CLL Strengths: Persevering, being accountable
CLL Opportunities: Understanding the enterprise, and influencing others
